

# Analog output module E7110-8I

## Features

- Eight 4-20 mA outputs
- RS485 interface
- Modbus RTU/ASCII protocols
- Universal 230 VAC / 24 VDC power supply

## Specifications

Power supply	90...264 VAC 20...375 VDC
Power consumption	≤ 6 VA
Number of outputs	8
Output type	standard analog current 4-20 mA
Output accuracy	< ±0,5 %FSO
Output load resistance	0...1300 Ohm
Output power supply range	10...36 VDC
Communication interface	RS485
Baud rate	up to 115 200 bit/s
Communication protocols	Modbus RTU, Modbus ASCII
Protection class	IP20
Dimensions	63×110×73 mm
Mounting	to DIN rail or wall
Operating environment	Safe indoor areas
Operating conditions	-10...+55 °C, < 80 %RH, without condensation
